

Fig. A

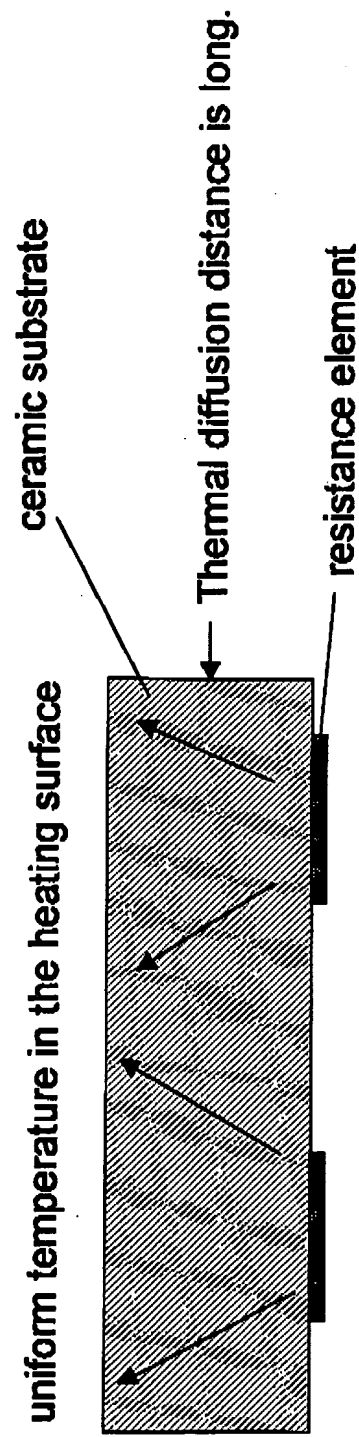

Fig. B

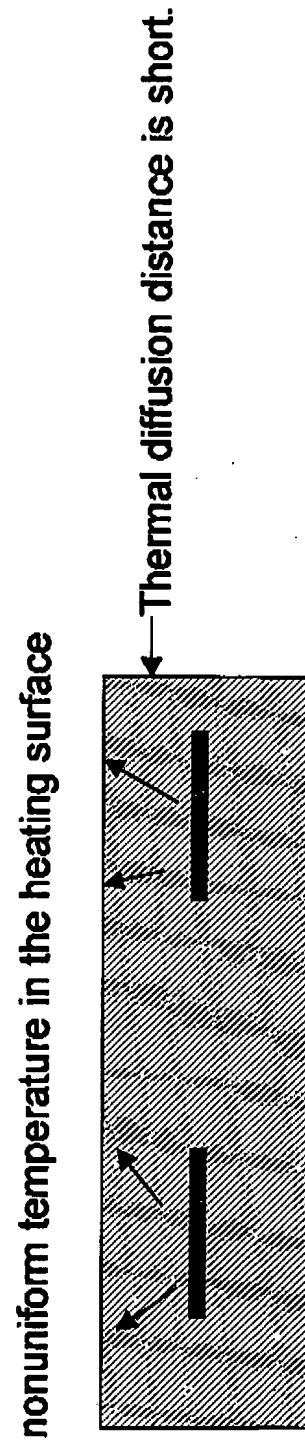

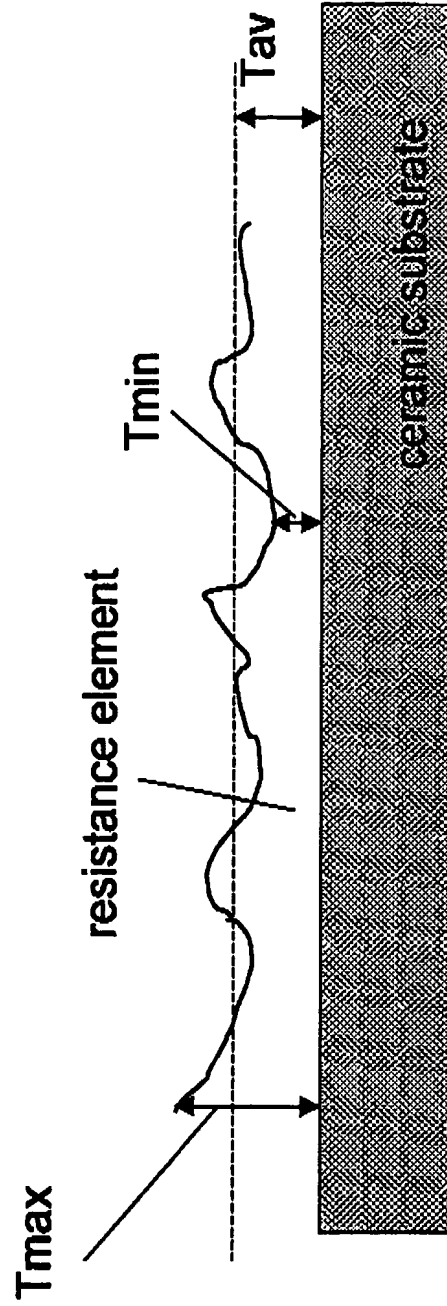

Fig. C

If the absolute value of $T_{max}-T_{av}$ is larger than the absolute value of $T_{min}-T_{av}$, the thickness dispersion is defined by $[T_{max}-T_{av}]$.

If the absolute value of $T_{max}-T_{av}$ is smaller than the absolute value of $T_{min}-T_{av}$, the thickness dispersion is defined by $[T_{min}-T_{av}]$.
